

## Web II | Final Project Proposal

ASHLEY STEINBERG

### DESCRIPTION

For our final project I'd like to develop a website for the mobile application that I'm developing for the student startup challenge at UWM.

Ah-ha! is a mobile app that connects users to various learning opportunities taught by members of their community.

The website would include a home page that would provide general information on the app including our mission and vision statements. From there it would include navigation that would allow the user to go to the blog page as well as listings of potential opportunities.

I would like this site to serve as something I can show to those involved in the student startup challenge as well as others interested in learning more about the app in general.

My hope is that I might eventually be able to develop into a proper site for this project.
